Weber
Labels & Labeling Systems

Label applicator

Label applicator provides fast, dependable labeling for a diverse range of applications. This versatile system employs the wipe-on or tamp-blow method to apply pressure sensitive labels in line at high speed. Label applicator automatically peels labels from the liner, then gently but firmly affixes them to products or packages as they pass by on a conveyor line or other handling system.

OMRON **BANNER**

Coding & Vision Inspection

The Next Generation of Advanced Color Sensing. For Demanding, Color-Critical Applications. Optical sensors and disadvantages. Many users hesitate to introduce a full-scale image sensor system, but at the same time, find it difficult to install and use an optical sensor system. Now there is a sensor that answers these problems. Not an optical sensor and not an image sensor, it's a brand new type of smart sensor. With the increasing importance that is being placed on quality control to day, you will find this sensor to be a major help in moving your production lines forward.
